**Investor Analytics Releases Next Generation
Fund of Hedge Funds Risk Product**

Michael Poisson to Lead Business Development

New York, 26th, November 2007 — Investor Analytics LLC, a global leader in risk analysis and risk management solutions to the hedge fund industry, announces today the launch of a returns-based analysis product specifically for the fund of hedge fund industry. At the same time, Investor Analytics announces the hire of Michael Poisson as Director of Business Development for the group.

The returns-based analysis is an advanced tool that allows fund of hedge funds managers to better understand hedge funds' sensitivities to driving factors. The tool will enable fund managers to understand the sources and drivers of returns and market risks and will allow them to perform far more meaningful scenario and stress analyses.

Market risk has been a main concern for hedge funds in recent months. Increasingly the trend among hedge funds, fund of hedge funds, as well as investors of alternatives has been to out-source risk management and risk analysis in order to safeguard investments and provide an independent third party assessment of a fund's risk profile. Investor Analytics' returns based analysis is tailored specifically for the hedge fund community in order to better understand a fund's exposure to market risk, and to provide better risk transparency.

-more-

Investor Analytics simultaneously announces the appointment of Michael Poisson as Director of Business Development. Mr. Poisson will be responsible for interfacing directly with IA's clientele of hedge funds, asset allocators and fund of hedge funds. Mr. Poisson will also be responsible for marketing strategies, and the management of IA's sales force.

Damian Handzy, CEO of Investor Analytics said, "The launch of IA's returns based analysis is especially useful in today's market. The product assists fund of hedge fund managers to perform stress and scenario analyses, which are essential tools in managing ever changing market risks. At the same time, we are delighted that Michael joins Investor Analytics to enhance and implement IA's strategic marketing initiatives. His background and technical experience will be of significant value to our clients."

Prior to joining Investor Analytics, Mr. Poisson was employed at Cogency Software (2005 – 2007), a provider of technology solutions to the hedge fund industry specializing in fund accounting. Previously, Mr. Poisson was Senior Vice President and Managing Director at SunGard Treasury systems, a supplier of internet and intranet treasury and risk management solutions from 1998 – 2005. Mr. Poisson is a graduate from Rensselaer Polytechnic Institute.

###
