**Investor Analytics LLC appoints Robert M. Aaron as
Non-Executive Vice Chairman**

***Gilwern Associates to Advise Global Leader in Risk Management Solutions on
Strategic Business Initiatives***

New York, 5th June 2007 — Investor Analytics LLC, a global leader in risk analysis and risk management solutions to the hedge fund industry announced today the appointment of Robert M. Aaron as non-Executive Vice Chairman with immediate effect. Mr. Aaron's role will include advisory services to Investor Analytics on business strategy development and implementation through his consulting firm – Gilwern Associates. Mr. Aaron's appointment comes at a critical time when risk management and reporting are increasingly at the forefront of portfolio managers' and investors' concerns.

Damian Handzy, CEO of Investor Analytics said, "We are very pleased to have Bob joining us as Vice Chairman. Bob's significant track record and expertise in the alternatives industry is a major driving force in further establishing Investor Analytics as a global leader in risk analysis and risk management solutions. Bob's leadership and in-depth knowledge is a significant benefit to the alternatives industry and to our clients as well."

Prior to accepting his role as non-Executive Vice Chairman for Investor Analytics, Mr. Aaron was Chief Executive Officer of DPM Mellon. In March of this year, Mr. Aaron resigned from DPM Mellon to build his consulting Company – Gilwern Associates.

Mr. Aaron said, "I am very pleased to join Investor Analytics as non-Executive Vice Chairman. Risk Management and reporting has been at the heart of my career for many years. As the Hedge Fund industry continues to strive for greater transparency increasingly these demands will be supported by a select and experienced few. Investor Analytics is such a firm."

Robert Aaron is currently Chairman of the Board of the Managed Funds Association based in Washington, D.C. Mr. Aaron is a key figure in the alternatives industry with professional experience spanning over 25 years and is a member of the Founder's Council of the Greenwich Roundtable.

Investor Analytics has been providing quantitative risk measures and analysis to the Hedge Fund industry since 1999. Increasingly, hedge funds, fund of hedge fund managers, and investors of alternatives have been out-sourcing risk management and risk analysis in order to safeguard investments and provide independent third party assessment of a fund's risk profile. In response to this trend, Investor Analytics has initiated innovative proprietary research to benefit the Hedge Fund industry and those looking to emphasize risk management as a core principal of their investment philosophy.

####

Investor Analytics LLC, headquartered in New York with offices in Granville Ohio, has been providing portfolio and risk management services to the hedge fund industry since 1999. Investor Analytics employs proprietary methodologies to analyze complex investment portfolios of hedge funds and fund of hedge funds and provides clients with a suite of customized risk and transparency analyses. Damian Handzy is Chairman and CEO.
